MEDX

Laser Therapy

Can light actually
accelerate healing?

EXPERIENCE THE HEALING NATURE OF LIGHT!

MedX Phototherapy is also known as light and laser therapy and is a safe and highly effective treatment method that offers you a rapid, drug free, non-invasive healing solution.

EFFECTIVE TREATMENT:

- ✓ Head, neck, and back pain
- ✓ Arthritis (Osteo and Rheumatoid)
- ✓ Post-Surgical recovery
- ✓ Pulls, Strains and Muscle Injuries
- ✓ Joint twists and sprains
- ✓ Carpal Tunnel
- ✓ Repetitive Stress Injuries
- ✓ Tendonitis

WHAT ARE TREATMENTS LIKE?

CAREFREE.

While you comfortably relax, therapeutic light energy can be effectively administered to one or more injured areas with our safe, low-level laser. The average treatment takes 5-15 minutes. MedX Phototherapy can be used on patients of all ages and be safely administered directly over pacemakers, implanted defibrillators, shunts or plastic/metal implants.

IS THIS A POSSIBLE ALTERNATIVE TO DRUGS OR SURGERY?

ABSOLUTELY.

For some conditions, this innovative, therapeutic healing method often eliminates the need for painful, debilitating surgeries and drug therapies which are usually accompanied by harmful side effects. MedX Phototherapy can be used as an exclusive treatment solution or can be used in combination with other healing methods provided by your clinic. MedX Phototherapy has proven very effective for conditions that are difficult to treat.

IS IT SAFE?

VERY.

There are no known side effects of phototherapy. Hundreds of scientific studies have proven it a safe and highly effective way to treat a variety of conditions. MedX Phototherapy is FDA and CSA certified and class IIIb laser technology. MedX products are used by practitioners in clinics, academic facilities, and hospitals as well as by professional athletes.

HOW DOES IT WORK?

NATURALLY.

Phototherapy is similar to photosynthesis in plants; sunlight is absorbed by the plant and converted into energy that the plant uses to grow. Developed over 35 years ago, phototherapy is a remarkable process that uses light to penetrate the skin's surfaces and underlying tissues. Much like photosynthesis, MedX Phototherapy provides light energy to your body's cells to increase their function and to stimulate your body's natural healing process, safely and easily.
